Mr. Stephen Mellon:

New Age Blast Media

I just thought I'd drop you a note saying how pleased we are with your crushed glass blasting media. We initially tried it on some graffiti on some blacktop streets. It really did the trick without damaging the asphalt. This was our major concern, and it worked great. Now we use it extensively on all of our major graffiti issues. It also works fantastic on cinder block walls as it gets into all the pits and doesn't damage the block. We use a drop cloth to contain the used media so we can re-use the material to "polish up" some metal projects before painting. I have recommended this product to a number of people in municipalities and in private businesses. Thanks Steve, for a great product!

Sincerely:

Daniel Lardinois
