BUSINESS SUMMARY

Novetas Solutions, LLC is the manufacturer of New Age Blast Media®, a 100% recycled glass blasting abrasive. NABM® directly benefits the environment, while eliminating the health risk of airborne carcinogens, introducing a modernistic approach to sandblasting medias.

CLEANER: Manufactured from 100% recycled container glass, NAMB® directly reduces landfill waste and limits the use of more toxic slags. It is non reactive and inert and can be used near water without containment.

SAFER: Dust is classified by OSHA/NIOSH as “nuisance dust.” It contains less than 1% free silica and has virtually none of the OSHA identified heavy/toxic metals associated with slags and some other mineral abrasives.

FASTER: Crushed glass delivers a natural, whiter, metal finish. It has significantly less embedment issues, *which is up to 5 times less than slags!* Dust is translucent, which allows for increased visibility and operation production!

CERTIFICATIONS

APPROVED BY THE CALIFORNIA AIR CONTROL BOARD (CARB)
APPROVED BY THE STRATEGIC PETROLEUM RESERVE (NJ FACILITY)
APPROVED BY NAVESEA FOR QPL UNDER MIL A 22262B
